T 577 Information sheet

High tack industrial double sided tissue tape

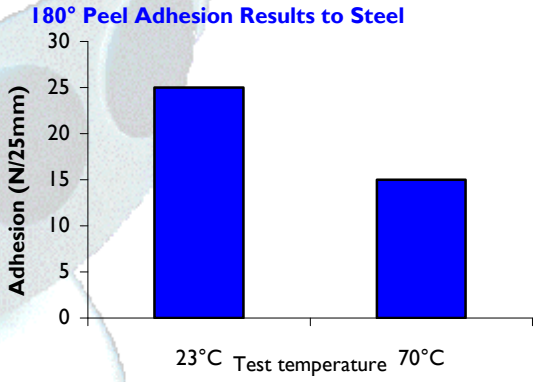
A thin tissue carrier coated on both sides with a high tack acrylic adhesive. Providing an excellent combination of very high adhesion and good shear performance.

Technical Data

Thickness	0.1	mm

Benefits

Exceptional combination of performance and price.
High tack adhesive bonds to a wide range of smooth and slightly rough surfaces.
Very high adhesion to glass, metals, plastics and many foams.
Good resistance to UV light and water.
Available with our production aid film release liner.

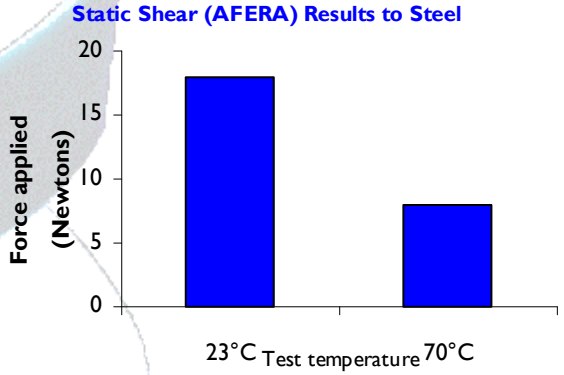


Limitations

Few. T 577 can be used in most situations, but performance may be limited on very low surface energy plastics such as polyethylene and polypropylene; and on very rough materials.

Double sided tapes offer the following production advantages:

Clean and simple to use.
Quick and efficient application.
Consistent adhesive coating thickness.
Consistent adhesion performance.
Instant adhesion.
No hazardous fumes.
No drying or curing times.
Ready for the next part of the application process.
No contamination of other surfaces.



Technibond offers this product in any width roll, converted to exact tolerance and dispatched within a few days.

Pads, diecut gaskets, sheets and special laminations also available.

Warranty

Our technical advice is offered in good faith but without warranty. The user is responsible for testing under their own conditions of use assuring themselves that it is suitable for their particular purpose. The technical data was obtained under specific laboratory test conditions, and should not be used for specification purposes without prior consultation with us.

Temperature Range

Min. Application Temperature = +5 °C

21/05/2009

Product Availability			
Product variations T 577 & T 577F	**Thickness** 0.1mm	**Colour** White tissue	
Width 6mm - 1250mm	**Release liner** Paper or production aid film		
Delivery All rolls cut to order and supplied within a few days. Pads and diecuts also available
