

### High tack double sided PVC film tape

A thin white PVC carrier coated on both sides with a heavy mass of a high tack, crosslinked modified acrylic adhesive. Resulting in a very aggressive high tack tape.

#### Benefits

- Very high tack bonds immediately to almost all materials.
- Excellent results on rough and textured surfaces.
- Good gap-filling on uneven mouldings and extrusions.
- Extremely high final adhesion on paints, metals, and PVC
- Good shear performance.
- Resists water solvents and plasticizers.
- Excellent ageing and UV resistance.

#### Limitations

The upper temperature limited is restricted by the PVC carrier, and 9274 has limited performance on very low energy plastics such as polypropylene and polyethylene.

#### Double sided tapes offer the following production advantages:

- Clean and simple to use.
- Quick and efficient application.
- Consistent adhesive coating thickness.
- Consistent adhesion performance.
- Instant adhesion.
- No hazardous fumes.
- No drying or curing times.
- Ready for the next part of the application process.
- No contamination of other surfaces.

Technibond offers this product in any width roll, converted to exact tolerance and dispatched within a few days.

Bobbins, pads, diecut gaskets, sheets and special laminations also available.

#### Warranty

Our technical advice is offered in good faith but without warranty. The user is responsible for testing under their own conditions of use assuring themselves that it is suitable for their particular purpose. The technical data was obtained under specific laboratory test conditions, and should not be used for specification purposes without prior consultation with us.

#### Technical Data

Thickness 0.26 mm

#### 180° Peel Adhesion Results to Steel

#### Static Shear (AFERA) Results to Steel

#### Temperature Range

Min. Application Temperature = +10 °C
